Do You Know The Automatic Pillow Packaging Machine?

Pillow packaging machine is currently the latest domestic automatic continuous shrink packaging equipment. Power saving and high efficiency; The shrinking temperature and motor transmission speed are stable and adjustable. And the adjustment range is wide; the original roller rotation device can work continuously.

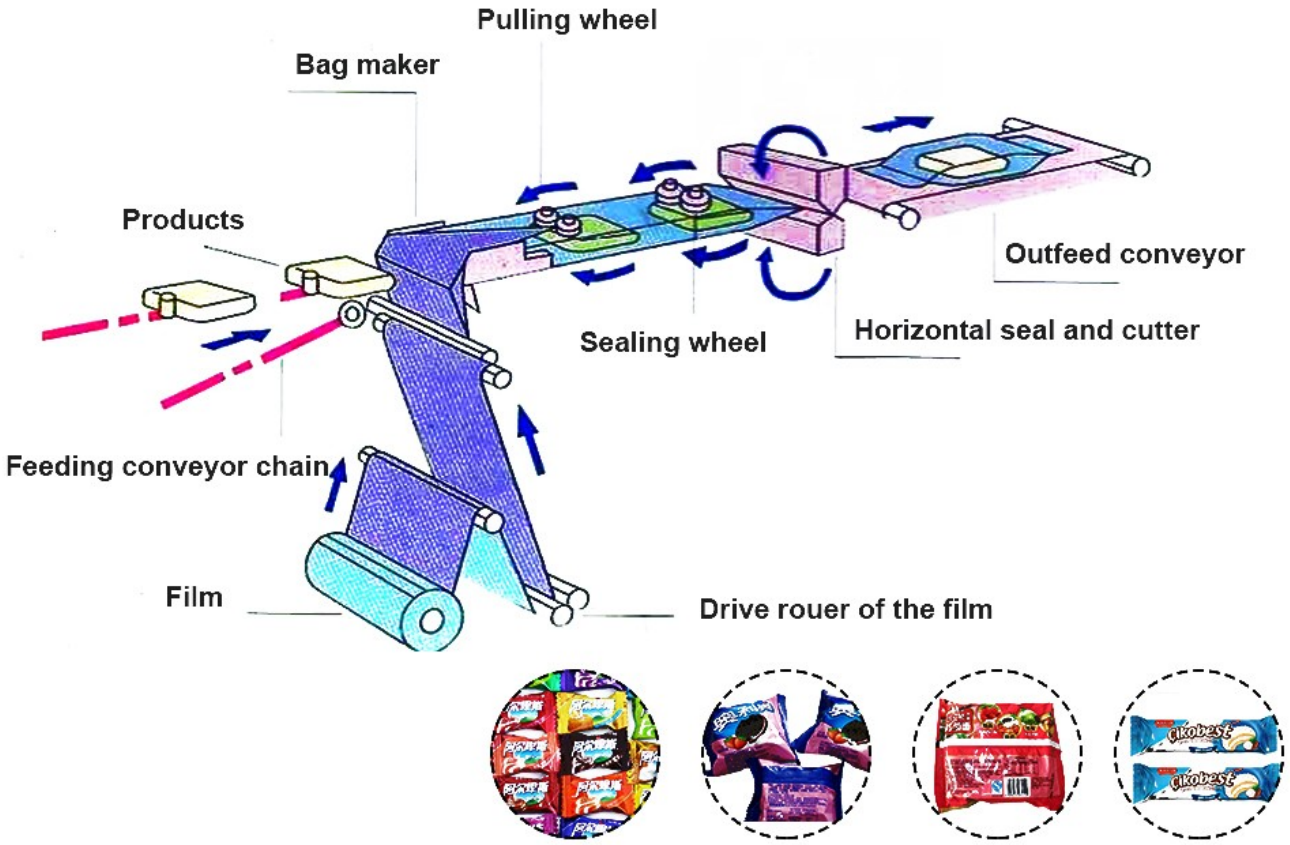
Pillow packaging machine is currently the latest domestic automatic continuous shrink packaging equipment. Power saving and high efficiency; The shrinking temperature and motor transmission speed are stable and adjustable. And the adjustment range is wide; the original roller rotation device can work continuously. How much do you know about the high speed pillow packaging machine? Next, Shandong Loyal will introduce the structure and characteristics of the pillow packing machine:

1) Double inverter control, the bag length is set and cut immediately, no need to adjust the idling, one step is in place, saving time and film.

2) Text-based man-machine interface, convenient and quick parameter setting.

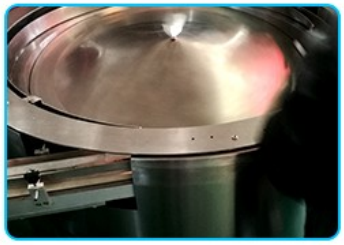
3) The fault self-diagnosis function, the fault display is clear at a glance.

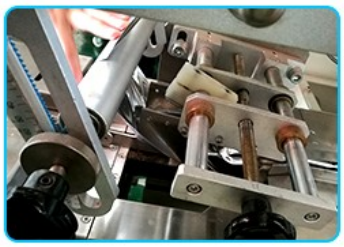
4) High-sensitivity photoelectric eye color mark tracking makes the sealing and cutting position more accurate.

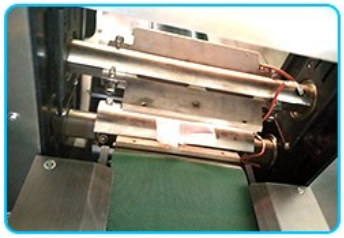


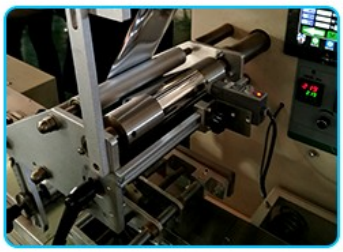
5) Independent PID control of temperature, which is better suitable for coating of various materials.

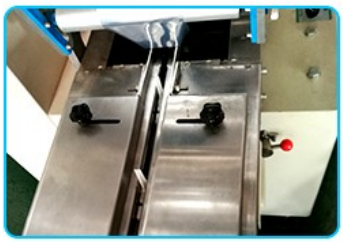
6) Positioned stop function, no sticking to the knife, no waste of film.

7) The transmission system is simple, the work is more reliable, and the maintenance is more convenient.










8) All control is realized by software, which is convenient for function adjustment and technical upgrade, and never lags behind.
