

What Are The Advantages Of The Rice Straw Production Line?

The rice straw is made of rice flour, cornstarch and other raw materials, which are extruded and cooled by an extruder to form and cut. A special cutting machine can be used to cut different lengths, diameters, thicknesses, etc.

The rice straw is made of rice flour, cornstarch and other raw materials, which are extruded and cooled by an extruder to form and cut. A special cutting machine can be used to cut different lengths, diameters, thicknesses, etc., and use after cooling, forming and drying. This kind of straw has the characteristics of environmental protection, no additives, edible, etc., suitable for the crowd: the elderly, children, infants, high-end catering market.

Introduction To Straws: In appearance, the rice straws are similar to ordinary plastic straws, and the taste of the drink will not be affected. The straws can be eaten directly, and the taste is harder, which is similar to rice crispy rice. The rice straw can be soaked in hot drinks for two to three hours, and it lasts longer in cold drinks. The production process of rice straws is not complicated, and the company has adopted automation and large-scale production. The current monthly output has increased to about 300 million, and it plans to supply hundreds of cafes and some hotels in South Korea.

1.Features of Shandong Loyal rice straw processing equipment

1	Centralized control of touch screen, accurate and convenient.
2	The motor and the distribution box are directly connected for transmission, with less energy loss.
3	Imported bearing set is adopted, with strong carrying capacity.
4	The barrel is equipped with a water injection device to better meet the requirements of raw materials and quality.
5	High-speed tool steel screw, hardness HRC?62, long service life.
6	Building block type combined screw can be combined freely according to different raw materials and products. 7. Linear bearing adjustment is accurate and fast.

2. Packaging And Transportation

Inside the package: plastic bag.

Exterior: wooden box (wooden box or wooden pellets are used according to customer requirements).

Shipping: Express or according to customer requirements.

3.Our Service

Pre-Sale Service

1	According to the customer's factory scale, the factory layout can be provided in advance.
2	Special machines can be provided according to customer requirements.
3	According to the special requirements of customers, we provide reasonable solutions and free design to help select equipment.

Service During The Sale

1	Assist customers in designing factories, provide professional advice, and provide free factory layout engineering drawings.
2	Welcome to visit our factory or domestic customers' factories.

3

Check the machine before leaving the factory.

After-Sales Service

1	The distribution map will be provided according to the buyer's request.
2	Train front-line operators.
3	Provide basic formulas.
4	Free perishable spare parts will be sent together with the container.
5	Installation can be done by engineers.
